Coming July 20, 2016
New Look For Weblogin

The new look
- Is mobile friendly. Looks the same across all your devices.
- Works with new two-factor solution. The university will begin using Duo instead of MTokens for systems that require two-factor authentication through Weblogin on July 20.

How you know it's safe
- Look before you log in. Make sure the URL begins with https://weblogin.umich.edu/ before entering your UMICH (Level-1) password.
